

# PERFORMING WHILE TRANSFORMING

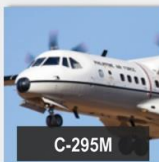

## PHILIPPINE AIR FORCE FLIGHT PLAN 2028

The PAF Flight Plan 2028 is a long-term development strategy of the Air Force anchored on good governance initiatives and performance excellence. It is designed to attain the PAF vision of becoming a more capable and credible Air Force responsive to national security and development

This journey started in 2014 and built on the Air Force's long-established culture of strategic planning while integrating strategy innovations such as the Performance Governance System (PGS) of the Institute for Solidarity in Asia (ISA). It has achieved significant milestones in the aspect of institutional governance and breakthroughs that are heavily skewed on the development of the PAF's ability to detect, identify, intercept, and neutralize threats within the Philippine Air Defense Area of Operations (PDAO). As part of its breakthrough results, PAF was able to acquire different aircraft soaring over the Philippine Defense Area of Operations. PAF's strength has been bolstered by new fighter aircraft, new rotary platforms, both manned and unmanned ISR platforms, and airlift planes.

### INITIATED

21 OCTOBER 2014  
PAF created its governance charter, strategy roadmap, balanced scorecard, and strategic initiatives.

### COMPLIANT

04 MAY 2015  
The strategy was cascaded through the creation of subsidiary scorecards, and a multi-sector governance council to act as oversight in the execution of its strategy.

### PROFICIENT

18 OCTOBER 2016  
A dedicated office was created to monitor the implementation and review the strategy.

# PADAYON PAF FRAMEWORK

## PERFORM

**Press-on** to perform with excellence in all mission areas.

## REFORM

**Achieve** significant milestones for the internal reform programs.

## TRANSFORM

**Focus** on priority PADAYON INITIATIVES to transform the Air Force.

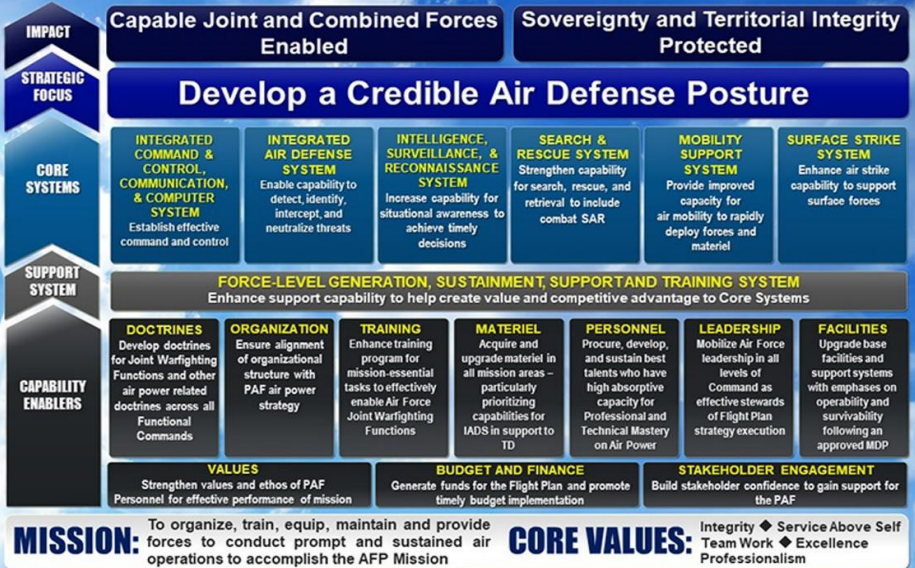

### Breakthrough Goal 2028

Develop a Credible Air Defense Posture in the Philippine Defense Area of Operations

### Waypoint 2022

Develop a Credible Air Defense Posture in the Priority Areas with Exhibited Competence in Integrated C4 System and ISA PGS.

**VISION:** A More Capable and Credible Air Force Responsive to National Security and Development
